OFFICE OF THE SECRETARY

PETITION FOR LEAVE TO AMEND

Barbara Brindisi, by counsel and pursuant to Section 73.3522(b) of the Commission's rules, hereby petitions for leave to amend her application pending in the above-identified proceeding. In support whereof the following is respectfully stated.

Submitted herewith is an amendment to Brindisi's application which demonstrates that Brindisi's proposed station would have no adverse effect upon the operation of nearby FM translator station K201AR, Banning, California. 1/

1/ The copy of the amendment being submitted herewith bears a facsimile of the applicant's signature. A copy bearing her original signature will be filed as soon as it is received by counsel.

Good cause exists for the acceptance of this amendment because, inter alia, the Commission has required Brindisi to file it in paragraph 3 of the Hearing Designation Order, DA 92-1733, released January 21, 1993.

Brindisi has acted with due diligence to prepare and file this amendment as soon as she was ordered to do so. Acceptance of this amendment will not result in comparative upgrading of Brindisi's application; will not necessitate the addition of any party or issue in this proceeding; will not be unfair to the other parties; and will not cause delay or disruption to the proceeding.

WHEREFORE, Brindisi respectfully urges the Presiding Judge to grant this Petition and to accept the accompanying amendment to her application.

Respectfully submitted,

BARBARA BRINDISI

February 23, 1993

AMENDMENT TO APPLICATION OF BARBARA BRINDISI**BEAUMONT, CALIFORNIA****File No. BPH-910703MI**

Barbara Brindisi hereby amends her above-identified application for authority to construct a new FM station at Beaumont, California so as to report the information in the attached engineering statement regarding the effect her proposed station would have on FM translator station K201AR.

Barbara Brindisi_____
Date

21 February 1993

BARBARA BRINDISI, APPLICANT FOR A NEW FM BROADCAST STATION ON CHANNEL
265A IN BEAUMONT, CALIFORNIA, FCC FILE NO. BPH-910703MI

TECHNICAL REPORT

This report has been prepared for Barbara Brindisi ("Brindisi"), applicant for a new FM broadcast station on channel 265A in Beaumont, California, FCC File No. BPH-910703MI, and is in response to paragraph 3 of the Hearing Designation Order, released January 21, 1993, in MM Docket No. 93-310.

The Commission expressed concern that the tower proposed by Brindisi as an antenna support may alter the directional antenna characteristics of FM translator station K201AR, Banning, California, BLFT-861110TB. Brindisi proposes to locate the proposed antenna support structure at the communications site used by K201AR.

K201AR operates on 88.1 megaHertz with a maximum effective radiated power of 9.0 watts and uses a Scala Electronic Corporation type HDCA-10H directional antenna. The antenna is horizontally polarized and is rotated 87.5° clockwise from true north.

Brindisi proposes a Class A FM broadcast station to operate on 100.9 megaHertz with a non-directional effective radiated power of 891 watts both horizontally and vertically polarized. The Brindisi antenna would be mounted on a guyed, steel, uniform cross-section tower of approximately 18 inches on a side.

The tower location proposed by Brindisi will be located on the back side of the K201AR antenna and at a distance of approximately 26 meters (84.3 feet). The effective radiated power from K201AR toward the Brindisi proposed structure does not exceed .005 watt based on relative voltage data provided by Scala for the HDCA-10H antenna.

Because of the very low power radiated from K201AR in the direction of the Brindisi proposed structure and because of the relatively great distance involved, there will be no measurable effect on the radiation characteristics of the K201AR antenna.

In addition, because of the relative low power proposed by Brindisi, no interference of an intermodulation nature is expected to occur to K201AR.

MILAN LEGGETT states under penalty of Perjury that he prepared the above report and that the information contained therein is true and correct to the best of his knowledge and belief.

Milan Leggett
